FRONT END SKILLS SET

Prototype Sample

Role - UX & UI Designer.

PROOF

PROOF ASSESSMENT SYSTEM

Improve how you build and deliver your assessments. Increase reliability and validity. Automate management of certification programs.

Develop Your Exam

If you want to build top-notch exams, you better do it right. Designing our systems to drive best practices and implement psychometrics. We love evidence based research, not fancy window-dressing.

Deliver Your Exam

Implement state-of-the-art approaches like adaptive testing and tech-enhanced items with the option for virtual proctoring or proctored test centers. Our system has delivery based exams for you.

Manage Your Exam

Our remote proctoring platform also allows you to easily manage registration and oversee your programs. Including your own testing locations. No staff? We can even run it for you effectively.

Grow Your Exam

Analyze your tests with classical test theory or item response theory and automatically produce useful report documents. Implement next gen computerized adaptive tests (CAT).

Overview and Scope

The scope of this project was to come up with a Proof of Concept for online presence for a company, showcasing the list of services offered by the company, and make the content delivery available to the customers. The requirement was to come up with a minimalist design.

The Users

Public facing customers

The Problem

Outdated web pages that needed to be updating to conform to customer needs

The Process

Stakeholder brainstorming session and presentation, covered scope, research, competitive analysis, content inventory, metrics analysis prototypes and Web Accessibility.

- Translated concepts into user interface design specifications for web portal and mobile portal.

- Designed high-impact, customer-centered pages that conveyed the company's brand, value proposition and industry-leading functionality.

The Solution

- The redesigned pages optimized the overall experience and behavior of customer interaction with pages.

- High retention of customers, increased lead gen and customer conversion

- Increased awareness of company's branding, services and products.

PoC UI Sample

SuperGood

Role - Concept Design.

Welcome to SuperGood!

Your number one nutrient-dense superpowers packed smoothie, fuel your life with healthy, wholesome food.

Email Address

Sign up for mailing list

Loose Weight

Our smoothie is very healthy and promotes weightloss in an organic manner.

Add Muscle

Our wholesome brand gives you the necessary proteins and nutrients that promotes muscle growth.

Stay Alert

Whenever you are on the go and you need to stay alert, SuperGood has got you covered.

The scope of the project was to raise awareness for a nutritional brand and also collect email addresses for mailing list to keep people up to date on the products, all within a landing page.

In this design, I used warm colors like orange to evoke energy, happiness and vitality, which aligns with health and is one of the product attribute. The blue color complements the design to exude calmness. The layout, typography, background image, and visual hierarchy works harmoniously with the brand and also passes the intended message across to customers.

Tableau User Access Request

Role - UX Research, Strategist & Designer.

MG Analytical dashboard is a web app that showcases health centers performances by region, states and health centers across a country. The scope was to tell stories with received data via visualizations.

The Users

Project Leaders and Site Admin

The Problem

No validation of form

The Process

Derived business processes, analyzed user needs, assisted in requirements definition, designed browser-based interfaces, and conduct usability testing.

The Solution

Redundancy is eliminated

Work flow became automated

Quality and consistency of data is improved due to automatic lookup of access requests on the server

Validation of data reduced time to fill out and complete process requests

Target users had a central repository to view requests
